

$$\frac{\partial v}{\partial t} + v_k \frac{\partial v}{\partial x_k} - \nu \Delta v = -\nabla p$$

$$\frac{\partial v}{\partial t} + v_k \frac{\partial v}{\partial x_k} - \nu \Delta v = -\nabla p$$

$$\frac{\partial v}{\partial t} + v_k \frac{\partial v}{\partial x_k} - \nu \Delta v = -\nabla p$$

$$\frac{\partial v}{\partial t} + v_k \frac{\partial v}{\partial x_k} - \nu \Delta v = -\nabla p$$

Institute of Mathematics of the Academy of Sciences

Mathematical Institute of the Charles University

Nečas Center for Mathematical Modeling

organize an international workshop

$$\frac{\partial v}{\partial t} + v_k \frac{\partial v}{\partial x_k} - \nu \Delta v = -\nabla p$$

$$\frac{\partial v}{\partial t} + v_k \frac{\partial v}{\partial x_k} - \nu \Delta v = -\nabla p$$

$$\frac{\partial v}{\partial t} + v_k \frac{\partial v}{\partial x_k} - \nu \Delta v = -\nabla p$$

$$\frac{\partial v}{\partial t} + v_k \frac{\partial v}{\partial x_k} - \nu \Delta v = -\nabla p$$

# Nonlinear PDE's

to commemorate the work of **Jindřich Nečas** (14. 12. 1929 – 5. 12. 2002),

an outstanding Czech mathematician who contributed to many fields of mathematical analysis.

## Date

December 13–15, 2009

## Location

Institute of Mathematics of the Academy of Sciences, Žitná 25, Praha

Faculty of Mathematics and Physics, Charles University, Malostranské nám. 25, Praha (Dec 14 afternoon)

## Invited speakers

Ph. Ciarlet (*Hong Kong*), P. Drábek (*Plzeň*), M. Feistauer (*Praha*), J. Franců (*Brno*), J. Frehse (*Bonn*), A. Friedman (*Columbus*), G. P. Galdi (*Pittsburgh*), M. Giaquinta (*Pisa*), J. Haslinger (*Praha*), W. Jäger (*Heidelberg*), O. John (*Praha*), J. Kačur (*Bratislava*), J. Málek (*Praha*), J. Naumann (*Berlin*), A. Novotný (*Toulon*), P. Quittner (*Bratislava*), T. Roubíček (*Praha*), M. Růžička (*Freiburg*), A. Sequeira (*Lisbon*), D. Ševčovič (*Bratislava*), C. Simader (*Bayreuth*), V. Souček (*Praha*), J. Stará (*Praha*), E. Viszús (*Bratislava*), W. Wendland (*Stuttgart*)

## Organizers

Šárka Nečasová and Milan Pokorný
