

Vor. IV.19 $f \in L^1_{loc}(\mathbb{R}^d)$, $\varphi \in \mathcal{D}(\mathbb{R}^d) \Rightarrow f * \varphi_1$ vind deconv.

$$f * \varphi \in C^\infty(\mathbb{R}^d), D^\alpha(f * \varphi) = f * D^\alpha \varphi$$

Dk: $k := \sup \varphi \Rightarrow k_1$ hom psl.

- $x \in \mathbb{R}^d \Rightarrow f * \varphi(x) = \int_{\mathbb{R}^d} f(y) \varphi(x-y) dy = \int_{x-k}^{x+k} f(y) \varphi(x-y) dy$

$\Rightarrow f * \varphi(x)$ je ~~def~~ dnečim - (f integrabilna - m + - k,
 $\varphi(x-\cdot)$ spojita (teg
 (množenje na $x-k$))

- $f * \varphi$ spojita: Vétu o spojivosti podle parametru

$$\exists x_0 \in \mathbb{R}^d, r > 0$$

$x \mapsto f(y) \varphi(x-y)$ je spojita na $U(x_0, r)$
 pro $y \in U(x_0, r)$

$y \mapsto f(y) \varphi(x-y)$ je mekátna pro $y \in U(x_0, r)$

$$|f(y) \varphi(x-y)| \leq \|\varphi\|_\infty \cdot |f(y)| \cdot \underbrace{\varphi}_{U(x_0, r) - k}$$

integrabilna - majoranta

- pro C^∞ a $D^\alpha(f * \varphi) = f * D^\alpha \varphi$ slací použít indukci -
 a dležit do pro jeho paragonu derivaci.

$$\exists x_0 \in \mathbb{R}^d, r > 0 \quad h(x_0, y) = f(y) \varphi(x_0 - y)$$

- $y \mapsto h(x_0, y)$ je mekátna -

- $\frac{\partial}{\partial x_1} h(x_0, y) = f(y) \cdot \frac{\partial}{\partial x_1} \varphi(x_0 - y)$

- $|f(y) \cdot \frac{\partial}{\partial x_1} \varphi(x_0 - y)| \leq \|\varphi\|_\infty \cdot |f(y)| \cdot \underbrace{\varphi}_{U(x_0, r) - k}$

integrabilna - majoranta)
