DATA SCIENTIST - HIGHLY CHALLENGING PROJECTS

Would you like becoming a member of an international team striving to use math, statistics and programming to solve really challenging problems? Are you both a creative and responsible person? Are you interested in working for a startup company?

We would strongly like you help us with a wide spectrum of challenging activities encompassing:

- problem research and formulation,
- feasibility study preparation,
- setting up our cloud environment,
- scripting crawler to extract data,
- preparing analytical database,
- creating predictive models.

We expect you are a graduate or a master student capable and interested in at least a majority of:

- machine learning,
- statistical modeling (R preferred),
- experiment design,
- optimization techniques,
- computer science fundamentals,
- scripting (Python preferred),
- Database Management Systems,
- parallel databases (e.g. Hadoop),
- doing research in English.

We offer you to become our key colleague with the possibility to grow with us from the beginning and we will give you:

- highly competitive salary,
- opportunity to build your skills,
- full or part time work on contract,
- flexible working hours,
- possibility to work from home,
- communicate (written) in English.

We are looking forward to hearing from you!

If you think you do not fully match all the requirements, but still interested in our proposal, do not hesitate to respond.
